

## Exterior of gate

All general paths of circulation providing access to the public right of way and egress from a building or facility requiring egress shall provide pedestrian gates at those locations. Areas with occupant loads greater than 50 must provide panic hardware, other areas require single lock hardware. Pedestrian gates may use screening to provide security.

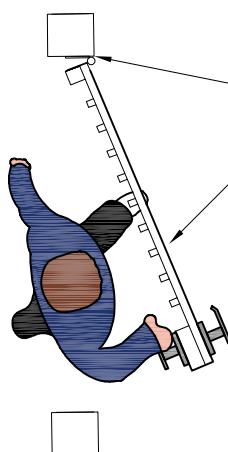

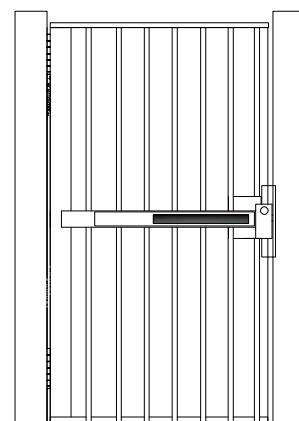

## Vehicular gate

Fences and gates around pools must meet the requirements for pool enclosures (see pool enclosure standard). These drawings represent examples and are not intended for the purpose of design for a particular project. (additional Fire requirements may apply)

## Inside of gate

Gate must open outward towards street and close automatically.
